

Date **01/19/2021**

Model **32C-15-6/10 w/chain top rigging**

Rated Capacity **30,000 Pounds**

Serial Numbers **78975, 78976**

Order **128050**

The equipment referenced above, meets ASME B30.20 standards and structural design criteria per ASME BTH-1 design category B, service class 2 effective at the time of manufacture.

Refer to current ASME B30.20 standards for inspection, testing, and maintenance for all equipment.

This certification is based on the design and condition of the product when shipped from the manufacturer.

This certification does not account for repairs or modifications completed by others.

The rated capacity of each unit is recorded on the identification tag attached to all products.

Read and understand the equipment instruction manual before operating. The user shall understand and act according to industry standards and all other applicable city, state, and federal regulations.

Contact the manufacturer to replace tags and decals that are damaged, missing, or both.

This certification is expressly limited to the standards and design criteria listed in the foregoing paragraph, shall not be relied upon by any party other than the addressee of this letter, and does not constitute an express warranty, create any implied warranty which may have been disclaimed by the manufacturer, or expand any implied warranty which may apply to the sale of the subject equipment.
